

Approval for Use of Hydraulic Oil

Hydrol L – HV 32

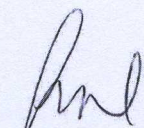

The **Hydrol L – HV 32** hydraulic oil has been laboratory tested and, based on the results of the tests, found fit for the assignment of the following symbol:

TDS 120 / 48

The TDS symbol specifies permitted intervals between oil changes, it means a mileage of 120 000 km or a fuel consumption of 48 000 ltr for TATRA vehicles. The value which occurs first is decisive for the oil change.

The time of validity of this approval shall be 3 years from the date of grant. After expiration of this time limit the approval may be extended at request. The approval can be withdrawn if any deterioration in quality is detected or if oil formulation changes occur without TATRA, a.s. being notified.

Dated : 11th December 2012
